

Atlas Logistique is a brand of Humanity & Inclusion (HI, the new name of Handicap International) that specializes in local supply chain management, including logistics platforms. Its goal is to close the gaps in humanitarian aid delivery chains so resources reach beneficiaries safely and efficiently.

Since its founding in 1991, Atlas Logistique has been implementing humanitarian logistics solutions in acute and chronic crises. It merged with HI in 2006, combining its logistic platform expertise with HI's institutional standing and presence in around 60 countries.

Our mission

Implement logistics solutions in response to emergencies or chronic humanitarian crises

1. Identify the logistics needs and constraints humanitarian actors may face when responding to major crises
2. Identify local logistics resources available
3. Implement common logistics solutions – including shared transportation, cross-docking, storage management, logistic hub management, mechanics and engineering – to respond to the identified needs
4. Reopen communication channels (roads, bridges and airport runways) to ensure resources reach the affected area quickly and safely
5. Provide logistic support and expertise in search and rescue contexts

Prepare stakeholders before an emergency or chronic crisis occurs

1. Support humanitarian actors with emergency preparedness in areas at risk of a crisis, by identifying potential logistics needs, constraints and resources
2. Manage networks of humanitarian, private and public actors that may be involved in humanitarian response efforts
3. Build capacity of local logistics actors

Our principles in accordance with HI's values

Humanity: Atlas Logistique allows humanitarian operators to maintain their independence from logistics services providers. The quality, efficiency and reliability of our services take precedence over economic considerations. Our pooled logistics services limit the effects of inflation and encourage solidarity between humanitarian actors.

Inclusion: Atlas Logistique's services help make aid available to all. We ensure aid reaches communities in the most isolated areas affected by humanitarian crises.

Commitment: Atlas Logistique aims to find logistics solutions wherever routes are insufficient or lacking. We support the agility, adaptability and innovation of humanitarian operations, and mobilise local resources to deliver relief quickly, effectively and economically.

Integrity: Atlas Logistique's goal is to optimise humanitarian aid provision, not profit. We are accountable to the humanitarian community and strive for professionalism, impartiality and transparency in our activities and the use of funds.
