b. Humanitarian law instruments ratified by the country

- Mine Ban Treaty / Status: Adhered* on 2/4/14
- Convention on Cluster Munitions / Status: Not signed
- UN Convention on the Rights of Persons with Disabilities / Status: Not signed

*In a legal sense, adhering to a treaty equates to ratifying it and only differs in that it is not preceded by the preliminary treaty signing phase.

² PCBS, Census Final Results Summary, 2018 for 2017 Indicators
³ HDI, UNDP, 2017
⁴ GDI, UNDP, 2017
⁵ MMR was 30.6 in Gaza Strip compared to 19.8 in West Bank.
⁶ UNDP, 2013 (no data on GINI in Palestine since then).
10 According to OECD data for 2018
c. Geopolitical analysis

1. Social/cultural/demographic elements

The Occupied Palestinian Territories (oPt), the West Bank the Gaza strip and East Jerusalem, have been the scene of perpetual on and off fighting with the Israeli army, since Israel declared the Establishment of the State of Israel in 1948. This resulted in an exodus of refugees in neighbouring countries, namely Jordan, Lebanon, and Syria and an ever increasing number of refugees and internally displaced Palestinians within the disputed territory. To this date, the UN agency for Palestinian refugees (UNRWA) estimates that there are over 4,500,000 Palestinians that are refugees or internally displaced. The recent months have seen a worsening of the humanitarian situation, particularly in the Gaza strip, due to several factors.

2. Political context

The occupied Palestinian territories lack real leaders since the unified government failed, and while them are still trying to embody a political leadership, their resources are scattered and reveals their current weaknesses and inability to confront the Israeli forces. On the other hand, the international support towards the Palestinian cause is getting weaker, including within the Arab world, leaving the Palestinian population in a highly vulnerable situation, leading to sporadic individual acts of violence towards the Israeli population, consequently leading to more control and over-reaction from the Israeli forces, perpetuating the decades old vicious cycle.

The legislative elections in Israel on April 9 and the Middle East peace plan of the Trump administration ("Deal of the Century"), which is finalized and expected to be presented after the Israeli legislative elections, will probably add more fire to the unstable situation.

3. Economical elements

According a recent World Bank report, the economy in the Gaza Strip is in “free fall”, shrunk by 6% in the first quarter of 2018\textsuperscript{11}, with an unemployment rate of 44% in 2017 and salary cuts between 30% and 50% on the Palestinian Authority’s payroll. Despite recent improvements and outside support, the Gaza Strip population was affected by 18 to 20 hours of scheduled electricity outage in 2018. In addition the GRM events have also increased already high levels of psychosocial distress: according to the 2019 HNO, 52,000 persons including 26,000 children are in need of Mental Health and Psychosocial Support (PSS).

\textsuperscript{11} World Bank, Palestine’s Economic Outlook – October 2018
Furthermore, the restriction of access to Palestinians in over 60% of the West Bank is dramatically hindering Palestinians’ access to employment opportunities.

Presence of HI in the country

HI has been working in Palestine since 1996 with its main mandate being to support disability organisations. In 1999, the organisation set up first anti-personnel landmines and other explosive remnants of war education initiative. A large number of development initiatives have been run since then in a number of fields in partnership with local associations: functional rehabilitation (technical assistance, equipment, training, and publications), psycho-social support, DPOs empowerment, and local inclusive development, access to education and access to employment. Following the summer 2014 humanitarian crisis in Gaza, HI complemented its development intervention with emergency and post emergency response in the fields of rehabilitation, reconstruction and anti-personnel landmines and other explosive remnants of war risk reduction.

| Inclusion           | The health, living conditions, social inclusion and socio-economic development of people with disability are improved. Facilitating access of persons with disabilities to quality health and social services through an inclusive and holistic approach | • Capacity building of the rehabilitation staff to address the needs of CWDs in school settings as well as the needs of PWDS involved in employment process.  
• Support adaptation of mainstream schools for inclusion including accessibility as well as the provision of specialized educational materials and equipment.  
• Support the development and dissemination of an Inclusive Education guideline under the IE policy of the MoEHE including review of existing infrastructure standards.  
• Strengthen the referral system to ensure access to services and effective linkages between the different sectors.  
• Promote knowledge transfer and sharing good practices on inclusion through local and national events  
• Provide employers technical support to be more accessible and inclusive through assessment, recommendation and drafting of an action plan, awareness raising of the entire staff and training of dedicated committee to act as disability focal point for the follow up of the action plan.  
• Increase knowledge of public and private sector stakeholders on economic barriers for PWDS and obligations of the actors towards PWDS.  
• Support mainstream job portal to become accessible for PDWs seeking jobs. | 288 persons with disabilities.
