c. Geopolitical analysis

1. Social/cultural/demographic elements

Thailand is a unitary state, the only Southeast Asia country never colonized by a European power. The majority of the population is Buddhist. Religion is of a great influence in Thai’s everyday life\(^2\). The Thai culture is a mix of Indian influences, Chinese traditions and elements that are uniquely Thai. Despite a strong unity of the Thai culture, each of the four regions composing Thailand has its own unique cultural and geographic features (Thailand is a country of some 70 ethnic groups). Thailand is the 50\(^{th}\) largest country in the world and the 20\(^{th}\) most populated country, with half of its population living in urban areas.

2. Economic elements\(^3\)

With a well-developed infrastructure, a free-enterprise economy, and generally pro-investment policies, Thailand historically has had a strong economy, but experienced slow growth in 2013-15 as a result of domestic political turmoil and sluggish global demand. Thailand’s economic fundamentals are sound, with low inflation, low unemployment, and reasonable public and external debt levels. Tourism and government spending - mostly on infrastructure and short-term stimulus measures – have helped to boost the economy, and the Bank of Thailand has been supportive, with several interest rate reductions. Economic growth is projected to reach 4.3% in 2019, as inflation is expected to reach 1.4%.

Thailand faces labour shortages and has attracted an estimated 3.2 million migrant workers from neighbouring countries, including Myanmar\(^4\). The Thai Government in 2013 implemented a nationwide 300 baht (roughly $10) per day minimum wage policy and deployed new tax reforms designed to lower rates on middle-income earners.

HI Team and intervention areas

HI Thailand has 142 staff members
Summary of HI presence in the country

HI operations in Thailand started in 1982 in the Cambodian refugee camps and operates along the border with Myanmar since 1984. The main activities since then have been: fitting refugees with locally-produced prostheses and adapted devices (orthoses, crutches, walkers, etc.), community-based rehabilitation\(^5\), empowerment of people with disabilities and their inclusion in local communities (villages, neighbourhoods, etc.), and the prevention of mine accidents through risk education activities.

Since January 2016, the site is managed within the MyTh program (created in January 2016 with its regional office in Yangon), in line with the refugees’ repatriation process, and aims at strengthening the coordination between HI activities in Myanmar and in Thailand around refugees’ reintegration. MyTh Regional Strategy 2018-2020 has been developed and approved in November 2017.

\(^5\) Community-based rehabilitation (CBR) consists in involving and training the friends and family of disabled people in rehabilitation exercises and care to ensure their self-reliance.
### Overview on ongoing projects
